KM World Seminar Series
Designing the Innovation Process
Building, Managing, Communicating and Measuring
Thursday, October 28, 2010, 1:00PM-4:00PM
Bangkok University - International Campus - Room 4 Road
Event organized by the Institute for Knowledge and Innovation (IKI-SEA) - Bangkok University

Dr. Alan Fine
University of Washington

Designing the Innovation Process: Building, Managing, Communicating and Measuring
Dr. Alan Fine

Two universal truths underlie most business operations: (1) intense competition and (2) the need to innovate. In the past, innovation was a rare event, often the result of a brilliant idea or a lucky accident. Today, however, innovation is a continuous process. It is a process that is built into the organization's DNA. It is a process that is designed, managed, communicated, and measured. This seminar will explore the process of innovation from the perspective of building, managing, communicating, and measuring. It will discuss the importance of innovation in the 21st century and the role of the organization in fostering innovation. It will also discuss the challenges of innovation and the strategies for overcoming them. The seminar will be presented by Dr. Alan Fine, a leading expert in the field of innovation. Dr. Fine is the author of the book "Designing the Innovation Process: Building, Managing, Communicating and Measuring" and is a frequent speaker at international conferences. He is also a member of the National Academy of Management and the American Academy of Management. The seminar is free of charge and is open to all interested parties. For more information, please contact the Institute for Knowledge and Innovation (IKI-SEA) at Bangkok University.

Designing the Innovation Process: Building, Managing, Communicating and Measuring

KM World Seminar Series
From Knowledge to Innovation
Wednesday, September 22, 2010, 1:00PM-4:00PM
