

NASA – Year in Knowledge 2010

Written by Christian Walter
Friday, 04 February 2011 16:45

The NASA has released their yearly report on Knowledge in Project and Engineering Leadership for the year 2010. It is a collection of success stories, white papers, case studies, and interviews, that highlight best practices, cultures of successful learning organizations, different types of innovation, the knowledge explosion challenge, and reflects critical elements for continuous development and improvement. Enjoy reading!
